FQAS is the one of the leading conference focusing on the key issue in the information society of providing flexible, easy, and (for human) intuitive access to information. In targeting this issue, the conference draws on several research areas, such as:

*   data driven and model driven querying;
*   classical and non-classical logics;
*   data generation;
*   fuzzy querying;
*   information retrieval and retrieval augmented generation;
*   knowledge representation and ontologies;
*   natural language processing and multimodal large language models;
*   reasoning under uncertainty;
*   fair, accountable, transparent, explainable and trustable query answering;
*   data quality.
